

Redefining Car Ownership in the Web3 Era

We're building the Web3 marketplace that transforms how people buy, sell, and finance their dream cars—powered by a token backed by real collector vehicles.

The Broken Car Buying Experience

Fragmented Process

Buying and financing cars involves multiple middlemen, endless paperwork, and weeks of waiting—draining time and money.

Inaccessible Collector Market

Rare collector cars remain locked in exclusive auctions, keeping enthusiasts and everyday investors on the sidelines.

Volatile Web3 Assets

Most crypto tokens lack real-world backing, leaving investors exposed to speculation, volatility, and fundamental distrust.

Our Solution: A Web3 Marketplace With Real-World Value

Seamless Marketplace

Buy, sell, and finance cars with fiat or crypto—no friction, no delays.

Asset-Backed Token

Our native token is backed by a vault of real collector cars, ensuring tangible value.

Growing Value

As the vault expands with rare vehicles, token holders gain exposure to appreciating assets.

Massive Market Opportunity at the Intersection

\$3T

Global Car Sales

Annual automotive market representing massive transaction volume and financing needs.

\$30B

Collector Car Market

High-value alternative assets with proven appreciation and passionate buyer demand.

\$1T

Web3 Economy

Fast-growing crypto ecosystem seeking real-world utility and asset-backed opportunities.

No competitor bridges these three worlds. We're positioned to capture a once-in-a-generation convergence of automotive passion, alternative assets, and blockchain innovation.

Product Experience: Seamless, Borderless, Trustworthy

How It Works

01

Browse Cars

Explore curated inventory from everyday vehicles to rare collectibles.

02

Choose Payment

Pay with ETH, USDC, credit card, or fiat wire—whatever works for you.

03

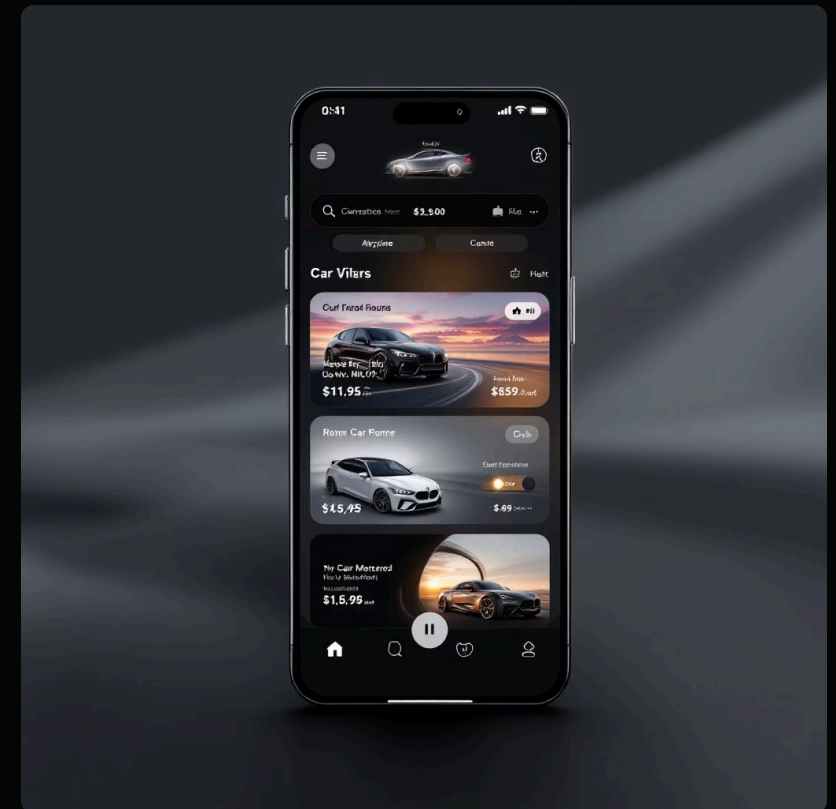

Instant Financing

Access crypto-collateralized loans or traditional financing in seconds.

04

Hold or Trade Token

Gain exposure to the collector car vault through our asset-backed token.

Built for trust and transparency, our platform combines Web3 innovation with traditional automotive excellence.

Diversified Revenue Streams

Transaction Fees

Earn a percentage on every car bought or sold through the marketplace—scalable with volume growth.

Financing Spreads

Generate margin on loans and financing products in both fiat and cryptocurrency.

Token Ecosystem

Capture trading fees, staking rewards, and transaction volume from our native token economy.

Premium Services

Offer high-margin concierge services: insurance, secure storage, vehicle inspection, and white-glove delivery.

Why This Model Wins

Resilient Revenue

Multiple income streams protect against market volatility and cyclical downturns.

Network Effects

More users drive liquidity, more liquidity attracts buyers, more activity strengthens token value.

Real Asset Backing

Unlike speculative tokens, ours is anchored to tangible collector cars with intrinsic value.

Traction & Momentum

Early Users

Engaged beta community testing platform features and providing feedback.

GMV Pipeline

Cars listed and ready to transact once marketplace officially launches.

Collector Cars

Initial vault acquisitions securing token value with rare, appreciating vehicles.

We've validated demand, proven the technology, and assembled a world-class team. Now we're ready to scale.

The Ask: Join Us in Building the Future

Raising \$5M Seed

To accelerate marketplace development, expand the collector vault, and scale go-to-market efforts.

18-Month Runway

Funds support product enhancement, strategic partnerships, regulatory compliance, and user acquisition.

Path to Series A

Hit \$10M GMV, prove unit economics, and establish category leadership in Web3 automotive.

Let's Redefine Car Ownership Together

The future of automotive commerce is borderless, transparent, and backed by real assets.

We're not just building a marketplace—we're creating a new category at the intersection of passion, technology, and finance. This is your opportunity to invest in the platform that will define how the next generation buys, sells, and experiences cars.
