

The Drive

The Web3 Marketplace & Vault for Collector Cars

A row of classic cars, including a silver one, a red one, and a dark blue one, parked in a museum. The scene is lit with blue and purple lights, creating a dramatic atmosphere. The cars are reflected on the polished floor.

The Problem

Market Monopoly

AutoTrader dominates the collector car marketplace but charges prohibitively high advertising fees while delivering minimal innovation or value-added services to dealers and sellers.

No Secure Settlement

Transactions lack escrow protection and crypto-enabled settlement options, leaving both buyers and sellers exposed to fraud risks and payment delays in high-value deals.

Illiquid Assets

Classic and limited-edition vehicles remain locked in private collections, accessible only to ultra-wealthy collectors, while everyday enthusiasts are completely priced out of the market.

Global Trade Barriers

Asian dealers depend heavily on UK sourcing for inventory but face critical challenges with financing access and transaction trust, limiting their growth potential.

Our Solution — The Drive Project

A comprehensive Web3-powered ecosystem that revolutionizes collector car transactions through blockchain technology, real-world asset backing, and global financing infrastructure.

Marketplace Platform

Drive Token payments integrated with secure escrow services, enabling seamless transactions for dealers and private sellers worldwide with built-in fraud protection.

Vault (RWA)

Classic and limited-edition cars serve as real-world assets backing the Drive Token, providing investors with tangible value and profit-sharing from appreciating vehicle collections.

Smart Financing

Smart contract-powered loans specifically designed to support Asian dealers importing UK vehicles, eliminating traditional banking barriers and reducing transaction friction.

Competitive Advertising

Lower-cost listing options compared to AutoTrader's premium pricing, making quality exposure accessible to more dealers while capturing significant market share.

Why Now

Market Timing Is Perfect

The classic car market has delivered consistent historical returns, outperforming many traditional asset classes. Simultaneously, crypto and DeFi adoption is accelerating globally, creating ideal conditions for blockchain-enabled marketplaces.

Strategic Opportunity

Dealers currently locked into AutoTrader's ecosystem are vulnerable to disruption from lower-cost alternatives. Asian market demand for European collector cars is surging, yet dealers lack the financing and trust infrastructure to scale efficiently.

Competitive Landscape

AutoTrader: The Incumbent

Profitable and trusted brand with massive dealer network. However, their model is static, purely ad-driven, and offers zero innovation in payments, escrow, or financing solutions.

Drive Project: The Disruptor

Complete ecosystem combining marketplace, secure escrow, and Drive Token payments. Vault-backed token delivers investor upside while financing for SEA dealers creates a true one-stop advantage.

Extra Features & Advantages

The Drive Project delivers unprecedented value across every stakeholder in the collector car ecosystem.

Private Sellers

Safe escrow protection, flexible crypto and fiat payment options, and instant access to a global buyer network without expensive intermediaries or geographical limitations.

Dealers

Dramatically lower advertising costs compared to AutoTrader, flexible financing options for inventory acquisition, and seamless access to global inventory networks.

Buyers

Trustless escrow ensures transaction security, financing options make dream cars accessible, and comprehensive access to rare vehicles from verified sellers worldwide.

Investors

Direct profit share from Vault car sales appreciation, transaction and escrow fee revenues, and exposure to high-yield DeFi opportunities in a real-asset-backed token.

Business Model

Advertising Revenue

Competitive listing fees positioned significantly below AutoTrader's premium pricing, capturing market share while maintaining healthy margins.

Vault Profit Share

Direct participation in appreciation and sales profits from curated classic and limited-edition vehicle collections held as real-world assets.

Financing Fees

Transaction fees generated from smart contract-powered loans to dealers and qualified buyers, creating recurring revenue streams.

Transaction Fees

Platform fees from Drive Token transactions and secure escrow services that facilitate trustless, high-value collector car deals globally.

Benefits of Getting Involved

3

Converging Growth Markets

Simultaneous exposure to classic cars, cryptocurrency adoption, and DeFi infrastructure—three high-growth sectors converging in one investment opportunity.

100%

Dealer Transformation

Dealers gain cheaper, safer access to global inventory while eliminating expensive middlemen and reducing transaction risks through blockchain technology.

1

One-Stop Ecosystem

Drive Token backed by real cars plus multiple revenue streams creates powerful network effects, strengthening value proposition as platform scales.

The Ask

01

Funding Round

Raising **[\$X] Seed/Series A** funding to accelerate platform development and market expansion across key geographies.

02

Use of Funds

Strategic deployment toward dealer onboarding in Southeast Asia, initial Vault asset seeding, platform development, and comprehensive regulatory compliance infrastructure.

03

Investor Upside

Equity participation, Drive Token allocation at favorable terms, and co-investment opportunities in high-value Vault assets with profit-sharing arrangements.
